

State of Ohio Business Intelligence Enhancement Release Notes – June 2013

The State of Ohio Business Intelligence is pleased to announce the enhancements from the month of June, 2013. These enhancements were all requested by users, approved by the Business Intelligence Shared Council (BISC) where applicable, built, tested, and validated. Even though the Business Intelligence team was very busy in June, helping agencies take the final steps to migrate away from their Legacy Cognos finance reports towards BI, we still released two enhancements that can be used state-wide.

Contents

1 – FIN Enhancements

1.1 New P2P Field – *Last Updated User* 1

2 – HCM Enhancements

2.1 Revised Workforce Profile Report – *WFP-019 Retirement Projections*..... 2

1 – FIN Enhancements

1.1 One new date field *Last Updated User* – has been added to the *Fact Voucher Distrib Line* table in the *Accounts Payable (Voucher to Payment)* subject area of the *Procure to Pay* data mart. This new field will allow users to. Despite the name of the table, users who want to include the ID of the last person to update a voucher in their reports should not use a field from the *Person Last Updated* table; they should use this new field instead. (see figures 1a and 1b on next page).

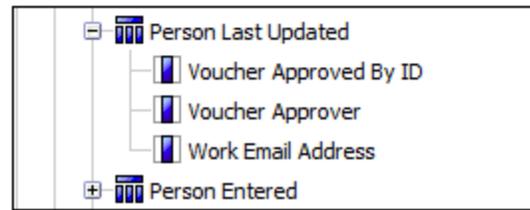

Fig. 1b

2 – HCM Enhancements

2.1 A prompt for *Job Code* has been added to the *WFP-0019 Retirement Projections* report. This will allow users to see how many people are projected to be retirement eligible and how soon by job code as well as by the already existing *Department ID* prompt.

If you have any questions about these enhancements, please contact the Business Intelligence team at Business.intelligence@das.ohio.gov. If you would like to request an enhancement, whether it is a new field or table for reporting, a modification to an existing Standard Report, or even an entirely new Standard Report, please contact the OAKS Help Desk.
